

EQUINIX SIGNS UP THREE ADDITIONAL CARRIERS TO ETHERNET EXCHANGE DEVELOPMENT PROGRAM

European-based Exponential-e, Hibernia Atlantic and Tinet to Participate in First Carrier-Neutral Ethernet Exchange

Amsterdam, The Netherlands – November 23, 2009 at Capacity Europe 2009 – Equinix, Inc. (Nasdaq: EQIX), a provider of global data center services, today announced that European-based carriers Exponential-e, Hibernia Atlantic and Tinet have signed up to participate in the recently announced Equinix Carrier Ethernet Exchange platform, a development program to define enhanced solutions for the exchange of data traffic between carriers providing Ethernet services.

These new European-based participants bring the total number of carriers involved in the global program up to nine. A list of the initial participants is available at <http://www.equinix.com/news/press/na/2009/news-5144/>.

The Equinix Carrier Ethernet Exchange program will establish a platform for multi-provider carrier Ethernet interconnection that meets Metro Ethernet Forum standards. The project focuses on Ethernet Network to Network Interconnection (E-NNI) as well as complementary features to enable a variety of benefits to participants. The initial deployment locations include London, New York, Chicago and Silicon Valley at Equinix International Business Exchange™ (IBX®) data centers.

“In order to offer Ethernet WAN solutions outside of our own geographical service area we currently need to establish separate interconnection relationships with other carriers on an individual basis; this process is both complex and time-consuming,” said Mukesh Bavisi, VP of Engineering at Exponential-e. “Equinix already plays a strategic role in our peering relationships with other Tier 1 service providers, so it is a natural choice that we leverage its carrier-rich interconnection hubs to develop an Ethernet interconnection infrastructure.”

“At Tinet, we are focused on helping local and regional service providers fulfill their global networking requirements and deliver international VPN services to their corporate customers,” said Paolo Gambini, Chief Marketing Officer of Tinet. “In particular, we are seeing an uplift in

demand for our global Ethernet Extension services. Traditionally, we have leveraged our vast network footprint and a number of Ethernet Network to Network Interconnection (E-NNI) agreements we have developed with various providers worldwide for fast and secure Ethernet delivery. Now with Equinix's new carrier Ethernet platform, we can further remove the technical complexities, making interconnections both quicker and easier to facilitate. This in turn means we are better able to support the growing network demands of our wholesale customers."

Demand for carrier Ethernet services is forecast to double within five years, according to Infonetics Research*. Additionally, in the past 12 months, Equinix has seen a significant increase in customer inquiries for a platform within Equinix that would enable carriers to easily interconnect their Ethernet networks.

"With more than 360 networks, Equinix's data centers are some of the most carrier-dense in the world; this makes them the ideal location for us to interconnect with complementary Ethernet service providers that operate beyond our Trans-Atlantic footprint," said Fergus Innes, VP of Sales EMEA at Hibernia Atlantic. "Based on the feedback from our customers, we believe that this new platform will enable us to expand our Ethernet offerings into multiple communities."

About Equinix

Equinix, Inc. (Nasdaq: EQIX) provides global data center services that ensure the vitality of the information-driven world. Global enterprises, content and financial companies, and network service providers rely upon Equinix's insight and expertise to protect and connect their most valued information assets. Equinix operates 45 International Business Exchange™ (IBX®) data centers across 18 markets in North America, Europe and Asia-Pacific.

Important information about Equinix is routinely posted on the investor relations page of its website located at www.equinix.com/investors. We encourage you to check Equinix's website regularly for the most up-to-date information.

About Exponential-e

Exponential-e designs and deploys bespoke network solutions, connecting company LANs regionally, nationally and internationally to create global office networks. Customer networks are created within Exponential-e's VPLS-enabled NGN (known as the Service Creation Platform or SCP) and do not touch the Internet, ensuring they are totally private.

In addition to fast, high capacity, flexible connectivity solutions, companies also access a range of enterprise services and applications which are hosted on the network. Managed and unmanaged storage, voice services, video conferencing, surveillance and colocation, plus some sector specific services are all available through a single access circuit onto the SCP.

Exponential-e's network solutions are fast, flexible and secure – giving customers responsive, scalable networks which reduce risks and costs while enhancing their business performance.

This press release contains forward-looking statements that involve risks and uncertainties. Actual results may differ materially from expectations discussed in such forward-looking statements. Factors that might cause such differences include, but are not limited to, the challenges of acquiring, operating and constructing IBX centers and developing, deploying and delivering Equinix services; unanticipated costs or difficulties relating to the integration of companies we have acquired or will acquire into Equinix; a failure to receive significant revenue from customers in recently built out or acquired data centers; failure to complete any financing arrangements contemplated from time to time; competition from existing and new competitors; the ability to generate sufficient cash flow or otherwise obtain funds to repay new or outstanding indebtedness; the loss or decline in business from our key customers; and other risks described from time to time in Equinix's filings with the Securities and Exchange Commission. In particular, see Equinix's recent quarterly and annual reports filed with the Securities and Exchange Commission, copies of which are available upon request from Equinix. Equinix does not assume any obligation to update the forward-looking information contained in this press release.
