

**HIBERNIA ATLANTIC'S 'HIBERNIA SECURE' SERVICE NOW OFFERS  
GUARANTEED 100% AVAILABILITY ON ITS FASTEST LIT CONNECTIONS  
BETWEEN CHICAGO, TORONTO, NEW YORK METRO, LONDON AND FRANKFURT**

**Key Points:**

- **With one single interface, the connection offers multiple low latency routes with guaranteed Service Level Agreements and 100% uptime**
- **Industry-leading 5-day turn-up or 1 month free, gives clients increased speed and reach to key financial cities around the globe**

**SUMMIT, NJ & DUBLIN, IRELAND – June 14, 2011** – Hibernia Atlantic, the only US-owned, diverse transatlantic high bandwidth connectivity provider, announces today it will bundle its industry leading 100% uptime Service Level Agreement (SLA) with Hibernia Secure on its lowest latency lit capacity between key U.S. and European financial cities. The '[Hibernia Secure](#)' service adds dedicated network protection across its low latency failover routes on Hibernia's [Global Financial Network](#) (GFN) and adds an additional layer of protection for financial firms' critical communications.

Hibernia Secure, like Hibernia's standard GFN service, also offers industry-leading, rapid 5-day installations, from signature to service, or will receive one month of free service guaranteed. Secure was created to meet the demands of the financial community asking for dedicated network protection over low latency failover routes between Chicago, Toronto, New York Metro, London and Frankfurt. Additionally, for a limited time, Hibernia Secure customers will be given 1 and 2 months of free service on 12 and 24-month term contracts, respectively.

"GFN's customers now have, with one single connection, access to multiple low latency network routes between key financial cities such as New York and Chicago and the peace of mind that comes with our improved SLA," states [Eric Gutshall](#), Executive Vice President of Sales & Marketing for Hibernia Atlantic. "This in turn strengthens GFN's speed and delivery to other highly sought-after financial cities, and provides a true competitive advantage for financial firms and high frequency traders globally."

**About Hibernia Atlantic's GFN:**

Hibernia Atlantic's [Global Financial Network \(GFN\)](#) is a financial exchange connectivity division of Hibernia Atlantic, the Trans-Atlantic, high-bandwidth, connectivity provider. Built on over 24,000

kilometers of network, GFN connects the world's largest exchanges' datacenters to its direct participants through secure and diverse dedicated, high bandwidth, ultra low-latency Ethernet and optical-level service from 1-GigE, 10- GigE, LanPhy wavelengths and traditional SONET/SDH services. Utilizing the Hibernia Atlantic diverse and secure backbone, GFN offers world-leading broker dealers, hedge funds, market data providers and other financial firms over 120 Points of Presence (PoPs) into key capital market cities in the US, Canada, UK, France, Germany, Ireland, mainland Europe and the Pacific Rim. Hibernia is building the lowest latency connectivity from New York to London with sub 60 ms RTD called [Project Express](#).
